

TYPICAL PERSONAL PROTECTIVE EQUIPMENT REQUIREMENTS

Note: The following information is provided as guidance for work supervisors at TA-53. These recommendations should be carefully considered, especially for work performed on or near electrical circuits. It is the responsibility of the work supervisor to specify the required PPE for a particular job. The primary concerns are electrical hazards. Most of you will not have direct access to specialized electrical PPE. Contact your Building Manager or the Facility Safety Engineer for assistance. Do not forget to protect personnel from noise, respiratory hazards, cryogenics, chemicals, compressed gases, steam, and biological hazards such as insects, rodents, and reptiles.

LEVEL 1 -

- Safety Glasses with side shields
- Insulated Hand Tools
- Double Insulated Power Tools (UL or CSA listed)
